

“ Our process

HadFrame prides itself with giving great customer service for design, manufacture and supply of buildings using technology of lightweight steel frames.

From the CAD drawings to immediate turnaround of delivered quotations; to timely supply of perfectly manufactured steel sections.

The perfect steps to your new home

Meeting our clients:

HadFrame will meet with all clients regardless of location, to discuss your project and the benefits of using light weight steel.

Agreement:

With agreement on pricing, HadFrame require the quotation to be signed by our client and returned to the HadFrame project manager to move on to the design stage.

Design stage:

With the working drawings, preferably in DWG format, HadFrame design team will design in 2D & 3D formats for approval.

Meet and sign off:

HadFrame will manage the progress of the manufacture and keep all parties updated for delivery to site.

Build:

Using our own qualified installation team, HadFrame will erect and install the frame and all cladding in two visits to our standard detail and then handover to following trades.

Customer satisfaction:

HadFrame prides itself on customer satisfaction and will continue to work for this throughout the building process. Clients will be given an end user manual for future maintenance working with light weight steel.

Enquiries:

HadFrame receives enquiries from recommendations, trades shows they attend and from their website.

All enquiries require architects dimensioned drawings e.g DWG, PDF etc.

Quoting:

HadFrame will quote for the project requested to their standard detail in a timely manner in preparation for a one to one discussion with our clients.

Deposit:

With the returned quote signed by our client, HadFrame will invoice a for a 40% deposit to cover the design stage, as this forms a significant part of the cost.

Deposit to manufacture:

Once design is approved, HadFrame will invoice for the second 40% deposit to go into production for producing the light weight steel framework to the signed off drawings.

Delivery:

Agreeing to a delivery date, HadFrame will arrange transport and man power to offload ready to install.

Completion payment:

On final completion of the project, HadFrame will invoice for the final deposit of 20%
